ABSTRACTED-PUB-NO: JP 2004021493 A

BASIC-ABSTRACT:

NOVELTY - The program has instructions to generate result report data which is stored in memory along with letter-of-credit number. When payment for letter-of-credit is performed, the bill-clearing data is generated and stored along with credit number. If a user requests

display of report data, the stated report and bill-clearing data are searched with respect to credit number and displayed.

DESCRIPTION - An INDEPENDENT CLAIM is also included for financial transaction support equipment.

USE - For supporting financial transactions for electronic banking in financial institutions e.g. bank.

ADVANTAGE - Since the bill-clearing data is displayed along with the letter-of-credit report data, the burden of customer for referring the information is reduced. Hence the financial transactions are performed effectively.

DESCRIPTION OF DRAWING(S) - The figure shows a sequence diagram of processing of financial transaction. (Drawing includes non-English language text).
